

WORKSHOP

Introduction to Research with Eye- tracking Glasses

INSTRUCTOR

Pupil Labs
(<https://pupil-labs.com/>)

DATE

30 January

TIME

13:00 – 17:30

PLACE

University of Salzburg
Unipark 3.208

COURSE DESCRIPTION

The workshop consists of 4 hours of training sessions with a Pupil Labs product Specialist and will cover the following:

Introduction to Eye Tracking: Understanding eye tracking, the metrics obtained, and their interpretation.

Eye Tracking with Neon (Part 1): Introduction to Neon, data collection, and synchronization between different Neon devices.

Eye Tracking with Neon (Part 2): Software walkthrough, including an overview of Pupil Cloud and its analysis tools.

Eye Tracking with Neon (Part 3): Advanced analysis pipelines and recommended tools for various research projects.

The workshop will include a detailed question and answer session where researchers can discuss problems specific to their research area.
